PROFILE

Java Full Stack Developer with nearly 4 years of experience (2+ years in Java and Spring Boot) building production systems end to end: Spring Boot microservices, Kafka-based messaging, Spring Security, Redis, Elasticsearch and AWS on the backend, and React and Next.js on the frontend. Domain experience in BFSI (client: Saraswat Bank, via Vigility), payment gateways and healthcare data (CCDA).

SKILLS

Java & Spring: Java, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Microservices, Apache Kafka, REST APIs, JWT, Maven, JUnit

Databases: SQL (PostgreSQL, MySQL), MongoDB, Redis, Elasticsearch

Cloud, DevOps & Tools: AWS (EC2, S3, SQS), Docker, GitHub Actions, Git, Postman

Frontend & Node.js: React, Next.js, JavaScript, TypeScript, Redux, Tailwind CSS, MUI, shadcn/ui, Node.js, Express, Socket.IO

AI & Automation: AI Agents, AI Workflows, n8n

Payment Gateways: HDFC, CCAvenue, Razorpay, Stripe

EXPERIENCE

Vigility Technologies Pvt Ltd · Noida, India

Apr 2026 – Present

Full Stack Developer

- Built a Kafka-driven PDF report generation system in Java and Spring Boot for Saraswat Bank, generating large reports asynchronously.
- Automated CI/CD with GitHub Actions, deploying to AWS EC2 and S3; production runs at 99.9% uptime.
- Reduced media storage by 40% and EC2 load by 25% on AWS.
- Implemented Socket.IO real-time notifications, cutting notification delivery time by 40%.

Tech: Java, Spring Boot, Kafka, AWS, GitHub Actions, Socket.IO

Hirring.com · Noida, India

Aug 2024 – Mar 2026

Full Stack Developer

- Implemented Spring Security with JWT authentication and role-based access control (RBAC) for 5,000+ users.
- Added Redis caching that reduced database load by 45%, and tuned queries to improve API response times by 20%.
- Implemented Elasticsearch indexing for 1M+ records with search responses under 300 ms.
- Built an asynchronous email pipeline on AWS SQS handling 10,000+ emails/day with priority-based delivery.
- Designed communication across 3+ microservices, including encrypted API-to-API data exchange.
- Built AI-powered automation workflows in n8n, reducing manual effort by 50%.

Tech: Java, Spring Boot, Spring Security, JWT, Redis, Elasticsearch, AWS SQS, Microservices

Mityung Infotech Pvt Ltd · Noida, India

Feb 2023 – Jul 2024

Associate Software Engineer

- Integrated HDFC and CCAvenue payment gateways and LoanTap APIs for secure, reliable transaction processing.
- Implemented Google / Facebook social login and cookie-based SSO, cutting login time by 35%.
- Developed a CCDA parsing library converting healthcare CCDA files to JSON for downstream integration.
- Improved UI performance with Redux and React Hooks; accelerated delivery with Tailwind CSS, PrimeReact, shadcn/ui and MUI.

Tech: React, Redux, Node.js, MongoDB, Tailwind CSS

PROJECTS

Creative Stock – Image-licensing e-commerce platform

Dec 2024 – Feb 2025

Full-stack marketplace for buying and licensing images, with cart, wishlist, search, Stripe payments and compressed image delivery from AWS S3. **Tech:** Spring Boot, React, MongoDB, Stripe, AWS S3, AWS EC2

HealthCare ChatBot – NLP-based disease prediction · [GitHub](#) (58 stars)

Desktop chatbot that predicts likely diseases from described symptoms, using spaCy for text processing and a Hugging Face NER model to extract medical entities. **Tech:** Python, spaCy, Hugging Face, Tkinter

ccda-reader – CCDA-to-JSON converter · [GitHub](#)

Next.js app that converts CCDA (Consolidated Clinical Document Architecture) healthcare XML files into clean JSON for easy integration. **Tech:** JavaScript, Next.js, React, XML

EDUCATION

B.Tech in Computer Science and Engineering · Veer Bahadur Singh Purvanchal University, Jaunpur

2018 – 2022

ACHIEVEMENTS

- Contributed to an open-source project: improved product search accuracy and implemented better filtering features.
